Arunava Maiti

AI Data Engineer @ NatWest Group | ML Engineer, Data Architect |
PG AI/ML @ IIT Roorkee
Bengaluru, Karnataka, India

Summary

NatWest Group depends on advanced data engineering to meet evolving business demands. As Assistant Vice President with over 3 years in this role, I contribute to designing scalable architectures and pipelines for structured and unstructured data. My work integrates modern cloud-native tools, batch/streaming mechanisms, and big data platforms like Snowflake and DynamoDB to ensure optimal data accessibility and operational efficiency.

A strong advocate for data governance, I focus on quality frameworks that empower data-driven decision-making. By leveraging expertise in Spark, Hadoop, and cloud ecosystems, I collaborate to migrate legacy systems and build innovative data solutions. My prior leadership at Cognizant sharpened my ability to streamline data architectures, fostering impactful analytics strategies for global clients.

Experience

NatWest Group

4 years 2 months

Vice President

September 2025 - Present (1 year 1 month)

I'm a lead data engineer and architect at NatWest, where I design and scale enterprise data platforms on AWS and Spark to handle terabyte-scale processing with speed and reliability. Over the years, I've driven strategic data initiatives that cut onboarding timelines from weeks to days, strengthened governance to meet 100% compliance, and introduced automation that boosted accuracy and efficiency.

I'm also passionate about exploring AI/ML to solve real-world problems and mentoring teams to deliver at their best. For me, data engineering is not just

about pipelines—it's about building trusted systems that power innovation across the bank.

Mentoring and guiding engineering teams on best practices, performance tuning, and cloud-native data solutions, fostering a culture of continuous improvement.

Assistant Vice President

August 2022 - September 2025 (3 years 2 months)

- Spearheaded the development of scalable data solutions for Open Banking at NatWest Group.
- Optimized performance and automated regulatory reporting, ensuring seamless compliance with industry standards.
- Achieved a remarkable 63% reduction in manual effort, driving efficiency and innovation within the team.
- Collaborated with cross-functional teams to enhance data management practices and improve overall service delivery.

Cognizant

3 years 4 months

Manager

November 2021 - August 2022 (10 months)

Bengaluru, Karnataka, India

In my role as a Manager at Cognizant, I specialized in data architecture, developing and managing ETL pipelines for Nike's projects. I optimized pipelines for the GOAL project, reducing processing time by 40% and improving data accuracy by 70%. I led data engineering initiatives for global clients, ensuring efficient data processing and analytics.

Leading the design and development of scalable data platforms leveraging Spark, PySpark, AWS EMR, Glue, and S3, supporting high-volume, business-critical workloads.

Driving data architecture initiatives, including data modeling, pipeline design, governance frameworks, and cloud adoption strategies, ensuring alignment with enterprise and regulatory requirements.

Implemented automated data ingestion, validation, and reconciliation frameworks, reducing onboarding timelines and improving data accuracy across multiple business domains.

Sr. Associate - Projects

May 2019 - November 2021 (2 years 7 months)

Bangalore

Lead Data Engineer

Nike

Data Engineer

July 2019 - October 2021 (2 years 4 months)

India

Capgemini

Consultant

February 2017 - May 2019 (2 years 4 months)

bangalore

- Developed and maintained ETL workflows using Informatica and SQL, transitioning to big data platforms.
- Supported diverse data warehousing projects across consulting and retail domains, enhancing data accessibility.
- Collaborated with business teams to design reporting solutions, translating complex requirements into effective data models.

Accenture in India

Software Engineer

October 2011 - January 2017 (5 years 4 months)

Bengaluru Area, India

- Delivered data engineering solutions in financial services and telecom, enhancing customer analytics and fraud detection.
- Migrated legacy ETL workloads to HADOOP/Cloudera, achieving improved scalability and cost efficiency.
- Developed SQL-based analytical models and dashboards, providing actionable business insights.
- Collaborated with cross-functional teams to ensure seamless data integration across diverse systems.

Education

Indian Institute of Technology, Roorkee

Postgraduate Certificate Program in Data Science & AI, AI,ML And

DS · (December 2023 - February 2025)

Anna University Chennai

Master of Computer Applications (MCA), Information
Technology · (2008 - 2011)

Pailan College of Management and Technology 156

BCA, Information Technology · (2005 - 2008)
